Narrativa descriptiva

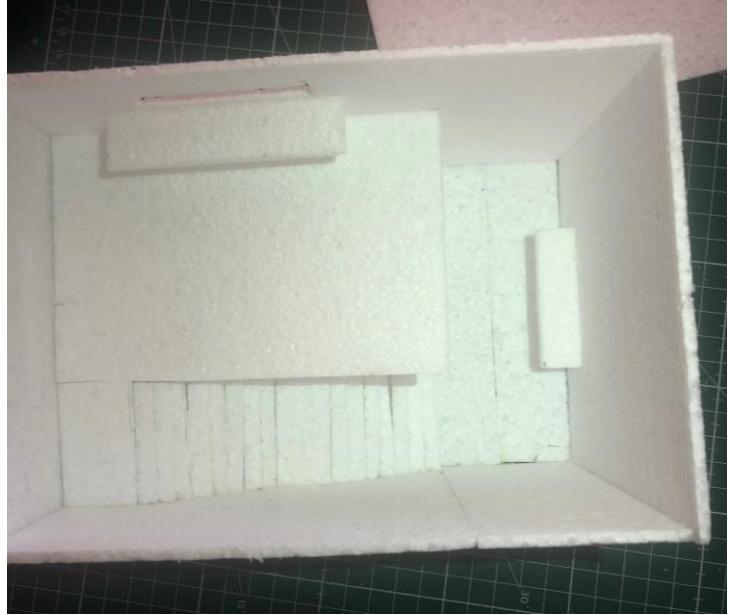

Este pavilhão quis responder às necessidades do ser humano, ainda mais, a necessidade de repousar ou de estar sentado diante de uma secretária.

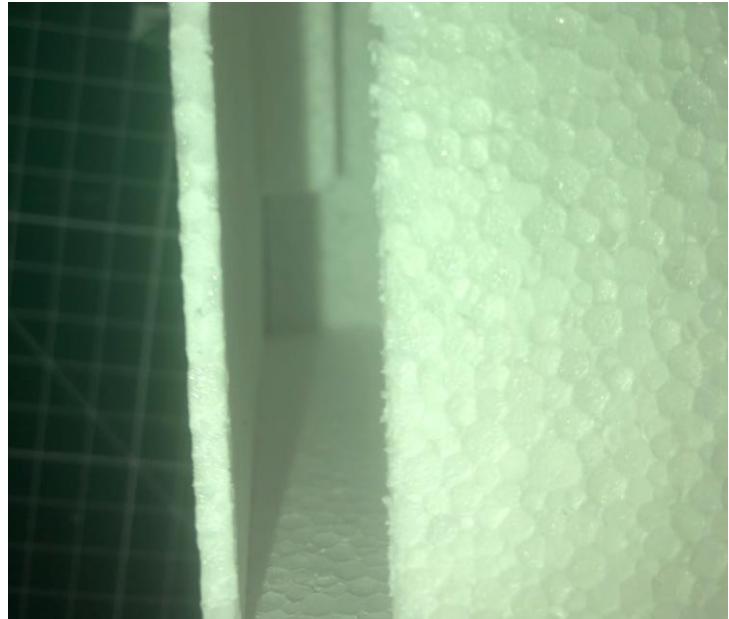

Por isso este pavilhão traz duas grandes qualidades: a luz e as vistas. Como na casa original que oferece quatro vistas diferentes do terreno, este pavilhão também tem esse mesmo conceito, uma das suas aberturas está virada para a imensa floresta que o terreno oferece, e outra está virada para o mar da ilha do Pico. O pavilhão oferece vários espaços com diferentes luzes, o espaço de repouso é sombrio mas ilumina-se com o uma única linha de luz com a ideia de uma toca; o espaço de trabalho tem adiante uma abertura na altura do olhar e ainda a cobertura existe uma abertura longitudinal que incide sobre as escadas criando assim uma linha de luz que nos provoca a necessidade de descobrir o pavilhão de cima a baixo.

Casa CZ . Sami Arquitectos

“ Queriam uma casa construída no continente, embarcada e depois assim montada no Pico. Queriam uma casa em madeira e queriam uma casa em contentores, como se fosse uma coisa muito pragmática, muito fácil de gerir esta ideia de uma casa em receptáculos.”
