Dizem haver, perto de um apeadeiro onde o comboio chega sem apitos, uma urbe incompleta, um terreno vazio e uma esperança de completude singela.

Contam, também, que, certo dia, se desenhou na névoa da serra um distribuidor que, crescendo como as ruas e arredondando linhas retas, serviu a cidade do seu jogo curvilíneo e acolheu as hostes que chegaram para o habitar.

Assim floresceu a Portela, louca, em curvas sem compasso e caixilhos de Mondrian.
