the line and the ecologic structure (according to PROT AML)

the green line, francis alys

In June 2004, Francis Alys walked in a portion of the "green line." The "green line" was drawn in 1948 to divide Jerusalem. The line was sketched in a map 1:20 000 with a green grease pencil. The grease pencils made lines 3 to 4 millimeters wide. Sketched on a map whose scale was 1:20 000, such lines in reality represented strips of land 60 to 80 meters wide. What does this ambiguous green line represent? A border, a green corridor, a building, or something else?
